

Jetic Gū

Columbia College

Please remember to include your name and student number.

You are required to utilise basic HTML to write a small webpage containing your answer to the following questions. For a sufficient tutorial on how to do so, I recommend: <https://www.w3schools.com/html/default.asp>

You must make sufficient effort to ensure the submitted webpage is properly formatted. Failure to comply will result in a ZERO grade. Your submission must be a zip file with the following file structure:

```
answer.zip
  index.html
```

Lab 1

Create an HTML File

In your text editor, create an HTML file named `index.html` with the following content.

```
<!DOCTYPE html>
<html>
<head>
  <title>CSCI101 Lab 1</title>
</head>
<body>
</body>
</html>
```

1. What is your dream profession **outside** of one related to computer science? Look it up, list 5 things that people in this profession needs to do with a computer. You should use an unordered HTML list for this.
2. Interview your parents, grandparents, or anybody elder to yourself (born before 1980). Ask about how they used to interact with their friends, colleagues, or even partners before the invention of computers, especially when they were your age. How is it different from your life now? (~250 words)

Grading criteria

- Grading will be performed based on 2 factors:
 1. The quality of your writing. If you've invested enough effort, you will be rewarded with a decent grade. Make it interesting, try to learn something new from your own research.
 2. Proper HTML formatting. Your webpage must contain a proper title, each answer must contain header and paragraphs. You should also use bullet-points when appropriate.
