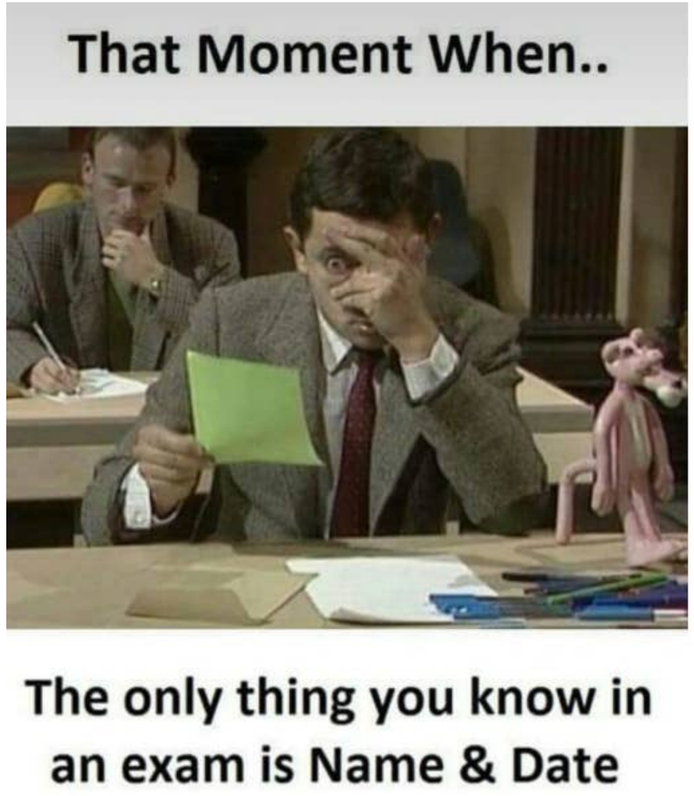
05.08.20 12:34

# CSCI 150
# Introduction to Digital and Computer System Design
# Final Review Week

Jetic Gū

2020 Summer Semester (S2)



# Overview

- Focus: Reviews
- Architecture: von Neumann
- Core Ideas:
    1. Information about the Final Exam, and the Final Review week
    2. List of all the materials we've covered

P1
Information

# Final Exam

- 10 Aug 2020, 13:00-16:00 (3 hours)
  - Actual load: **2 hours**
  - Website opens: **12:55-16:10**
- Questions **required** to be submitted on the test website
- Questions **required** to be submitted on CAMS (PDF)

| **Lecture**<br>Mon 13:00-14:50;<br>Wed 13:00-13:50;<br>Thur 13:00-14:50 | **Location**:<br>Online using Zoom, or Room 420<br>Columbia College Main Campus |
| **Office Hour**<br>Tues 13:30-14:50;<br>Thur 15:00-16:20;<br>Fri 14:00-15:20;<br>Room 544; Online (Shared) | **Midterm**<br>9 July 2020, 13:00-15:10 (Online)<br>**Final**<br>10 Aug 2020, 13:00-16:00 (Online) |

Concept

P1
Information

# Final Exam

- You do **NOT** need to live-stream yourself doing the test

Concept

P1
Information

# Final Exam

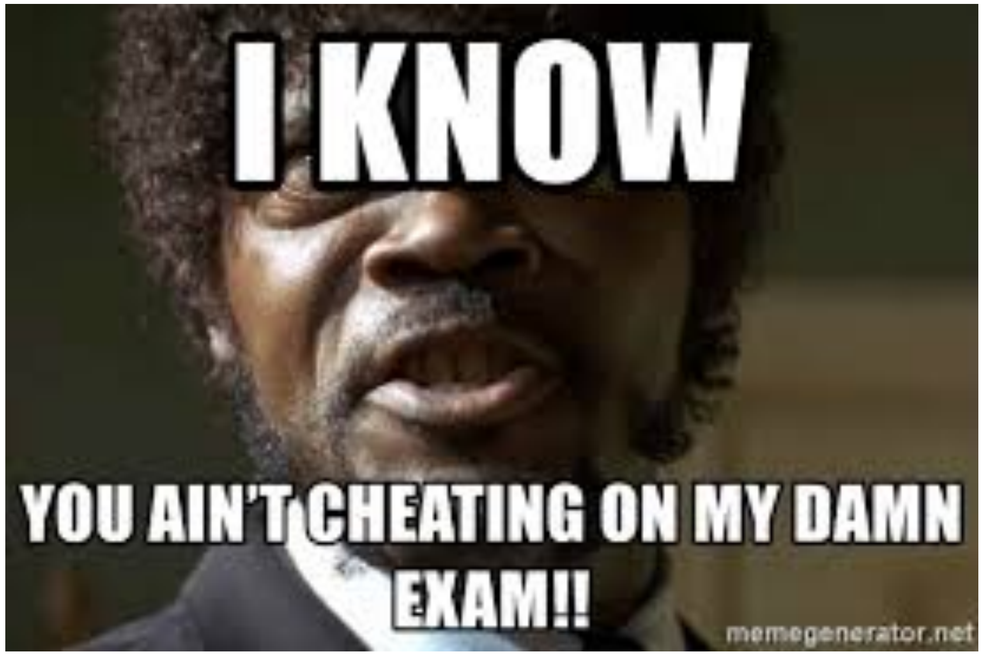
- College Policy
  - Closed-Book Exam (like any of us cares)
  - Sick/Absence: email me for deferral, I will submit to the counsellor
    - Retake/Make up: determined by the counsellor, he/she will contact you

Concept

P1
Information

# Final Exam

- College Policy
  - Cheating
    Me: **report** to the Academic Board
    You: **expelled** and **ejected** into the **sun** (or just where you came from)

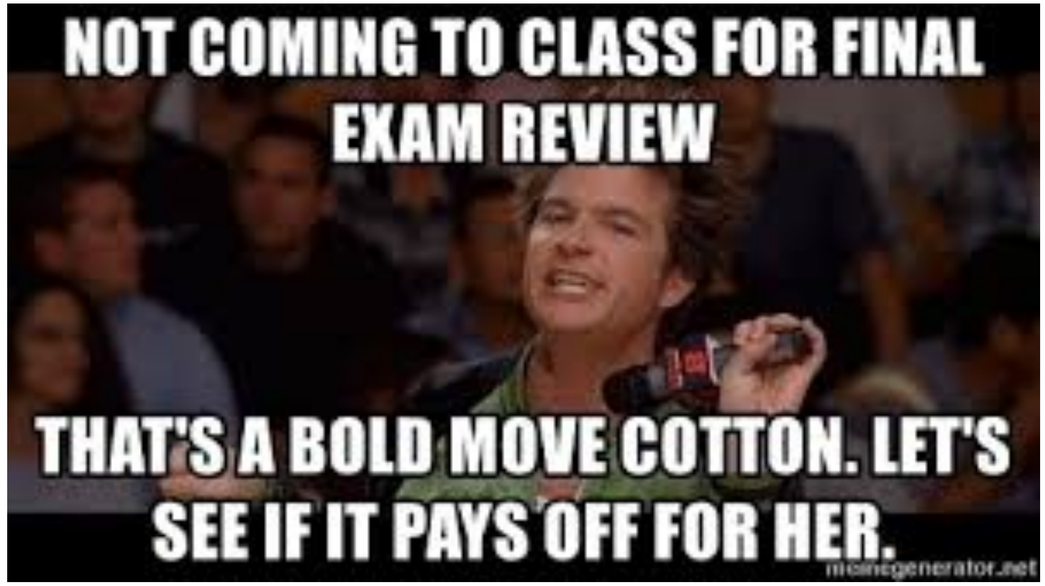


Concept

P1
Information

# Final Review Week

- Today
  - List of material we've covered
    Use as check list
  - Release **Mock Final Exam**
  - Q&A
- Thursday
  - Office Hours

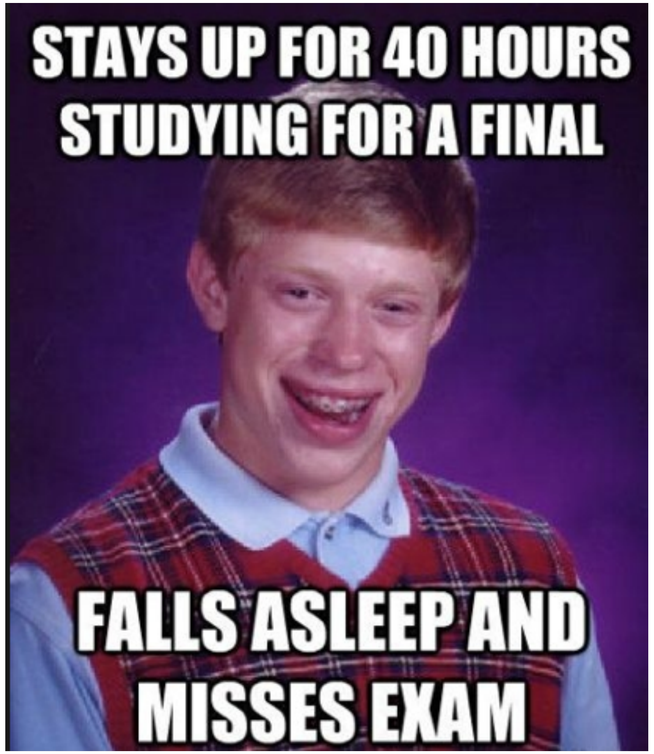


Concept

P1
Information

# Most Importantly…

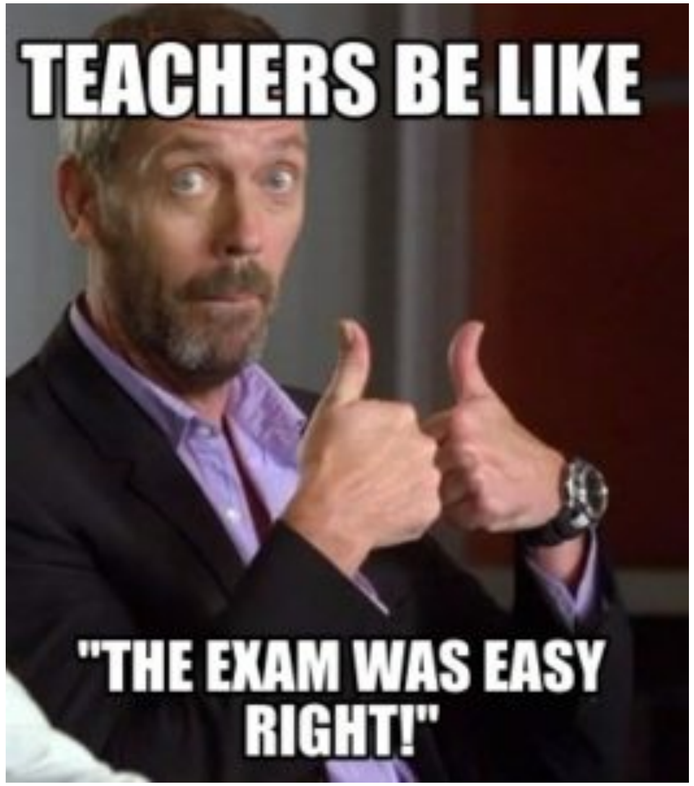
- Stay **Healthy**
- Stay **Active**
- Be **Positive**
- **DO NOT STAY UP LATE**



Concept

P2
Final Review

# Recap:
# what we've done



Summary

P2
Final Review

# Lecture 1

- **LS01**: Analog vs Digital; von Neumann Architecture; Embedded System; Binary, Octal, Hexadecimal Systems
- **LS02**: Arithmetic (+, -, ×); Unsigned vs Signed Integers; Digital/Analog Conversion
- **LS03**: BCD, ASCII, Parity Code

Concept

P2
Final Review

# Lecture 2

- **LS04**: AND/OR/NOT gates; Gating Delay; Boolean Algebra; Truth Table; Simulation & Timing Diagram;
- **LS05**: Binary Identities; Algebraic Manipulation; Complementation;
- **LS06**: Minterm/Maxterm; Sum-of-Products, Product-of-Sums;
- **LS07**: K-Map; Don’t Care conditions
- **LS08**: XOR; Buffer and Other Gates; Propagation/Transfer/Inertial Delay; Standard Load;

Concept

P2
Final Review

# Lecture 3A

- **LS09**: 5-Step systematic designing procedures
- **LS10**: Technology Mapping; Hierarchical Design; Functional Blocks
- **LS11**: Value-Fixing; Transferring; Inverting; Enabler; Decoder; Vector Denotation
- **LS12**: Encoder; Priority Encoder; Multiplexer

Concept

P2
Final Review

# Lecture 3B

- **LS13**: 1-bit Half Adder; 1-bit Full Adder; n-bit Full Adder (Ripple Carry)
- **LS14**: Unsigned 1-bit Subtractor; Unsigned n-bit Subtractor
- **LS15**: Unsigned 2s complement; Unsigned Subtractor correction; Adder-Subtractor; Simple Adder-Subtractor
- **LS16**: Overflow; Signed 2s complement; Signed Arithmetics; Incrementing/Decrementing; Zero Filling/Extension; Multiplication/Division by Constants

Concept

P2
Final Review

# Lecture 4

- **LS19**: Sequential Circuit; Stability; SR Latch; D latch
- **LS20**: Master-Slave Flip-Flops; D Flip-Flop
- **LS21**: State Table
- **LS22**: State Diagram (Mealy); 9-Step Design Procedures
- **LS23**: State Assignment; Input/Output Equation Determination; Unused States
- **LS24**: State Machine Diagram (Moore); TC and OC

Concept

P2
Final Review

# Lecture 5

- **LS26**: Registers; Datapath; Loading/Clearing/Enabling; GPR; Microoperations
- **LS27**: Datapath Implementation; Selecting Register; Datapath-level microoperation Implementation
- **LS28**: Single Register Microoperation Implementation; Multiple Register Microoperation Implementation
- **LS29**: Register Cell Design; Ripple Counter; Synchronous Counter; BCD Counter

Concept

P2
Final Review

# Lecture 6

- **LS30**: Basic intro to RAM and ROM; Definitions; Implementation of ROM

Concept

P3
Q&A Time

# Happy Review Week
