

Jetic Gū

Columbia College

This assignment is an individual work.

You are required to utilise basic HTML and CSS to write a small webpage containing your answer to the following questions.

You must make sufficient effort to ensure the submitted webpage is properly formatted. Failure to comply will result in a ZERO grade. Your submission must be a zip file with **exactly** following file structure:

```
answer.zip
  index.html
  q1.html
  q2.html
  style.css
  img/
    # relevant images here
```

The usage of incorrect filenames will result in a grade of 0.

## Lab 3

Base your lab 3 on your existing `index.html` from lab 2, continue to add features and make improvements.

1. Previously, all the answers to the 2 questions are in the same HTML file. In Lab 3, you are to separate them. Put the 4 layers of computer networks in `q1.html`, put the WWW portion in `q2.html`. Your `index.html` should now be a homepage or index, which provides hyperlinks to `q1.html` and `q2.html`.
2. Use `style.css` to
  1. change the font of all your writing to `sans-serif`;
  2. increase the font-sizes of all your writing from your browser's default;
  3. make all headings text bold, this covers all `<h#>`;
  4. resize the images in your webpage to a width of 400px;
  5. other aesthetic adjustment as you please.
3. Grading
  1. You may present your work to me in class to receive your grade immediately on Fridays.
  2. You must always upload the final zip file onto moodle, even if you present in person.
