

Jetic Gū

Columbia College

This assignment is an individual work.

You are required to utilise basic HTML to write a small webpage containing your answer to the following questions. If you ever get stuck, I recommend: <https://www.w3schools.com/html/default.asp>

You must make sufficient effort to ensure the submitted webpage is properly formatted. Failure to comply will result in a ZERO grade. Your submission must be a zip file with **exactly** following file structure:

```
answer.zip
  index.html
  style.css
  img/
      any images files you have
```

The usage of incorrect filenames will result in a grade of 0.

## Lab 2

Base your lab 2 on your existing `index.html` from lab 1, continue to add features and make improvements.

You are expected to write more about the 4 layers of computer networks, look up more details to add to the page, meanwhile, use the following.

1. Look up `<blockquote>` and `<section>` tag in [html tag reference](#). In addition to 4 layers of computer networks, create a new `<section>` and write a bit about the world-wide web in your webpage. In your writing, make sure to include a quote using `<blockquote>` from Tim Berners Lee that's coherent with your writing.
2. Look up `<address>`. In your name/student id section, include a new bit with your email. Make sure when the user clicks on it, the user can start his/her email client to write to you.
3. Use `style.css` to
  1. change the font of all your writing to `sans-serif`;
  2. increase the font-sizes of all your writing from your browser's default;
  3. make all headings text `normal` instead of `bold`, this covers all `<h#>`;
  4. resize the images in your webpage to a width of 200px;
  5. other aesthetic adjustment as you please.
4. In your writing, include a relevant image of Dr. Tim Berners Lee. You will need to use a URL from the internet, or if you are using your own, please ensure when I unzip your submission the image can be correctly displayed.
5. Grading

1. You may present your work to me in class to receive your grade immediately on Fridays.
2. You must always upload the final zip file onto moodle, even if you present in person.
