

Jetic Gū

Columbia College

This assignment is an individual work.

You must make sufficient effort to ensure the submitted webpage is properly formatted. Failure to comply will result in a ZERO grade. Your submission must be a zip file with **exactly** following file structure:

```
answer.zip
  index.html
  script.js
```

The usage of incorrect filenames will result in a grade of 0.

## Lab 5

In this Lab, you are required to achieve the same functionality as Lab 4, but using jQuery.

1. Inside `index.html`, you will include the following code:

```
<html>
<head>
  <title>Tax Calculator</title>
</head>
<body>
  <input id="price" type="text">
  <button id="button">Calculate Tax</button>
  <p id="results">No results yet</p>
</body>
</html>
```

2. You will now modify `script.js`, such that all usage of the `document` object are replaced with jQuery.

3. Grading

1. You may present your work to me in class to receive your grade immediately on Thursday.
2. You must always upload the final zip file onto moodle, even if you present in person.
